

# NewTechWood Disposal Guide

Thank you for choosing our sustainable product. To minimize environmental impact, please follow NewTechWood Product & Packaging disposal instructions.

## 1. Product Disposal (WPC Product)

✅ 100% Recyclable – NewTechWood Wood Plastic Composite (WPC) products are fully recyclable.

### ♻️ How to Recycle:

- Check with your local recycling facility to confirm acceptance.
- If curbside recycling does not take WPC, visit a specialized plastics/composite recycling center.
- Some manufacturers or retailers offer take-back programs—contact us for details.

## 2. Packaging Materials Disposal

✅ All packaging components are 100% or readily recyclable. Follow these steps to ensure proper disposal:

### A. Plastic Components

- PE (Polyethylene)
  - Includes: Plastic protective sheets, corner trims, logo-printed film.
  - ♻️ Disposal: Rinse if soiled, remove adhesives, and recycle with soft/flexible plastics (e.g., grocery store drop-offs, check local guidelines).
  - Where: Curbside (if accepted) or drop off at plastic film recycling bins (e.g., grocery stores).
- PET (Polyethylene Terephthalate)
  - Includes: Plastic straps.
  - ♻️ Disposal: Cut straps to avoid tangling machinery; recycle with rigid plastics.

### B. Wood Components

- Includes: Joists, fumigated pallets, plywood planks.
- Disposal Options:
  - ♻️ Reuse: Ideal for DIY projects or return to suppliers.
  - ♻️ Recycle: Untreated wood accepted at wood waste facilities or composting centers.
  - Bulky Waste: Some municipalities collect for recycling.

### **C. Metal Components**

- Includes: Steel/metal pellets (straps).
- Disposal:
  - Separate from other materials.
  - ♻️ Recycle at scrap metal facilities or curbside metal bins.

### **D. Paper & Cardboard**

- Includes: Corrugated cardboard boxes, labels.
- Disposal:
  - Flatten boxes; remove tape/labels if possible.
  - ♻️ Recycle curbside or at paper recycling centers.

## **Zero Waste Assurance**

- ✅ All materials are recyclable—nothing needs to landfill.
